'It is in your moments of decision that your destiny is shaped.' — Tony Robbins

A career counselling workshop was held at Bosco Public School for students of Class XI and XII, on October 3, 2024, covering all three streams: Science, Commerce and Humanities. The session was part of Bosco's ongoing initiative, following the recent establishment of its Career Guidance Cell. The event was graced by the eminent presence of the prudent vice principal, Ms. Priya Handa. The workshop, designed to guide students in making well-informed career choices, featured two esteemed guest speakers: Mr. Vanshaj Kaul, who addressed the Science stream and Mr. Ritesh Chawla, who engaged with students from the Commerce and Humanities streams.

The event began with a ceremonial sapling presentation to warmly welcome the guests, symbolizing growth and new opportunities.

Mr. Vanshaj Kaul, an alumnus of the Paris School of International Affairs, delivered an insightful session tailored for Science students. With over 13 years of experience in fields like agriculture, renewable energy and HVACR, Mr. Kaul stressed the importance of exploring interdisciplinary careers. He encouraged students to delve into areas such as sustainable development, energy efficiency and innovation, particularly in the face of global challenges like climate change and automation.

For Commerce and Humanities students, Mr. Ritesh Chawla, Co-Founder of RiarPro Learning, shared his expertise. With a robust background in Human Resource Management, Public Administration and Law, Mr. Chawla provided valuable insights into the education and Ed-Tech sectors. He emphasized the importance of building a professional network early, maintaining an active LinkedIn profile and seeking internships. He also urged students to think creatively and consider emerging career paths that combine technology and niche specializations.

The workshop was highly interactive, allowing students to engage in discussions about career readiness, multidisciplinary approaches and the evolving job market. The session proved to be an enriching experience, serving not only as a platform for valuable knowledge but also as a stepping stone for students to take advantage of Bosco's newly established Career Guidance Cell in shaping their academic and professional futures.
